

# Information Technology Center

The Information Technology Center is a 16,400 square foot award-winning building owned by Southeast Kentucky Economic Development Corporation (SKED). The Multiple tenant facility is designed to provide turnkey access and an advanced telecommunications infrastructure to businesses locating in the Valley Oak Technology Complex. The building is suitable for research and development, data processing, or use as a large-scale information processing center with access to a high-speed telecommunications network with extensive broadband connectivity capable of transmitting large volumes of voice, video and data information throughout the United States and the world.

## State of the Art Telecommunications

The Center has access to a 48-strand, single mode, high-speed fiber telecommunications network with direct broadband connectivity to an AT&T Point of Presence (POP) capable of transmitting large volumes of voice, video and data information throughout the United States and worldwide. Local and long-distance service is provided by a redundant OC-48 SONET fiber optic ring by Windstream Communications. Windstream also offers ISDN PRI for customers requiring high-speed access. The Center is wired to include voice and data cabling systems capable of supporting multiple environments such as fast Ethernet, voice over IP, video distribution and video teleconferencing. The building is designed for wireless communication needs.

## Room to Train

The Center includes dual training rooms allowing for customized training for both new and existing employees. Via a soundproof collapsing wall, the training facility can accommodate up to 25 employees at one time or host separate training sessions simultaneously.

## Video Teleconferencing Center

The Center comes equipped with the latest video teleconferencing equipment allowing for TV-quality video to meet the most demanding video communications needs and provides corresponding high quality audio. The system is designed to be attached easily to both peripherals and existing video and audio distribution systems, providing full interactivity for users. The system is capable of multi-point calls in ISDN and IP environments.

## Furnished Executive Suites and Conference Facilities

The Center comes with three fully furnished executive suites. Each suite is furnished with a professional desk, chair, credenza, guest chairs and a bookcase. The Board Room is equipped with teleconferencing facilities, a large executive table and accompanying chairs. Directly adjacent to the Board Room is a full-service kitchenette for catering important functions. Finally, the reception area will be furnished with a customized workstation.
